

## Blocks modify or add new ones

PHP-code for the blocks => descriptions of all available blocks in "PWS\_blocks.php"

**Do not modify or change this file as it is often updated.**

```

$script                = 'temp_c_small.php';          // max min temp
$blck_ttls[$script]    = $head_temp_sml; #head_temp_small;
$blck_rfrs[$script]    = $rfrsh_small + $rfrsh_temp;
$blck_setup[$script]   = 'Maximum/Mininimum temperatures';
$blck_type[$script]    = 's';

$script = 'baro_c_block.php';
$blck_ttls[$script]    = $head_baro;
$blck_rfrs[$script]    = $rfrsh_baro;
$blck_ppp [$script][] = array ('show' => true,      'popup' => 'PWS_graph_xx.php?period=day&type=baro', 'chartinfo' => 'popup', 'text
$blck_ppp [$script][] = array ('show' => true,      'popup' => 'fct_windy_popup.php?lang='.$used_lang, 'chartinfo' => 'popup', 'text
$blck_ppp [$script][] = array ('show' => true,      'popup' => 'image_popup.php?nr=baro_ao', 'chartinfo' => 'popup', 'text
$blck_setup[$script]   = 'Barometer information block';
$blck_type[$script]    = 'b';

```

The following specifications are needed for each block:

\$script	The internal name of the block
\$blck_ttls	The title of the block use on top of the block is translated using the language files
\$blck_rfrs	The block refresh time in seconds
\$blck_ppp	One or more links to the pop-ups for the block, <b>only used for the large blocks</b>
\$blck_type	'b' = normal large block with optional pop-up(s) 's' = small blocks in the top-row, no pop-ups used

The description of each pop-up

show	If the pop-up should be shown, true = always, false = "do not show" You can also use an <b>easyweather</b> setting like <b>\$metar</b> If you do not use the "metar" that setting is false, otherwise it is true Similar, if you have a weather flow device \$weatherflowoption is true
popup	The script to use in the popup
chartinfo	Will it be a <b>popup</b> like a graph or a small table Or will it be an extra page like the forecast in the wind block
text	The descriptive text for the pop-up in the bottom of the block

HOW-TO change the title-name of the block which is displayed in the header line of a block

- leave the name in "PWS\_blocks.php" as is,
- change the language translation files to "translate to the new text
- |Max-Min Temperature|Min-Max Temperatures|

IF you change the php-code of the block, f.i. an adapted small temp block

- Copy the block and give it a new name: f.i. **my\_temp\_c\_small.php**
  - Needed for correct updates: set the version number in the first line of the new php-filet to | 09 |
  - **DO NOT** modify anything in "PWS\_blocks.php"
- Just add a new block in . . /pwsWD/\_my\_settings/extra\_blocks.txt

## The description of a new block to be used example

```
script      = AQ_wh45_block.php
refresh     = 120
title       = Inside Air quality
popup-lnk0 = AQ_wh45_popup.php
popup_txt0  = Air Quality
setup       = CO2 data from your weather-station
type        = b
end
```

- Warning, this not PHP so do not add remarks / comments
- A new block start with `script` and ends with `end`

<code>script</code>	The script name of the block, unique
<code>refresh</code>	The block refresh time in seconds
	If wanted you can add 1 or more pop-up's, two lines for each pop-up should be entered Those 2 lines should have the same number from 1 onwards
<code>popup-lnk0</code>	The script name of the (first = 0) pop-up script, next popup should have <code>popup-lnk1</code>
<code>popup-txt0</code>	The name in the header of the block, check the translation files for existing names or use a new name.
<code>setup</code>	The text used in <code>easyweathersetup</code> for selecting the block
<code>type</code>	The <b>b</b> = normal block or <b>s</b> for small block

## Change the name of a block and remove unneeded pop-ups

```
script      = webcam3_c_block.php
title       = Satellite image
popup_not0  = none
end
```

<code>script</code>	The script name of the block to be modified
<code>title</code>	The new title, also add the translations
<code>popup_not0</code>	The pop-up numbering in the blocks start with 0 so this example the first pop-up will not be shown
